

Assignment 2.5: Operating System Information

Task 1: On your windows laptop or PC, open 'System Information' and take a screenshot showing your OS version, processor, and RAM details.

Item	Value
OS Name	Microsoft Windows 11 Pro
Version	10.0.26200 Build 26200
Other OS Description	Not Available
OS Manufacturer	Microsoft Corporation
System Name	NIRALIPATEL
System Manufacturer	Dell Inc.
System Model	Inspiron 15 3530
System Type	x64-based PC
System SKU	0C2F
Processor	13th Gen Intel(R) Core(TM) i7-1355U, 1700 Mhz, 10 Core(s), 12 Logical Proc...
BIOS Version/Date	Dell Inc. 1.32.0, 23-04-2026
SMBIOS Version	3.6
Embedded Controller Version	1.16
BIOS Mode	UEFI
BaseBoard Manufacturer	Dell Inc.
BaseBoard Product	06M9PH
BaseBoard Version	A00
Platform Role	Mobile
Secure Boot State	Off
PCR7 Configuration	Elevation Required to View
Windows Directory	C:\WINDOWS
System Directory	C:\WINDOWS\system32
Boot Device	\Device\HarddiskVolume1
Locale	United States
Hardware Abstraction Layer	Version = "10.0.26100.1"
User Name	NIRALIPATEL\niral

Fig 1. Laptop Information

Task 2: Download any official Linux distribution ISO (like Ubuntu or Fedora), and use Rufus or Balena Etcher to create a bootable USB drive for installation. Hint: If you don't have a spare USB, use a virtual machine tool like VirtualBox to mount the ISO and start the installation process virtually.

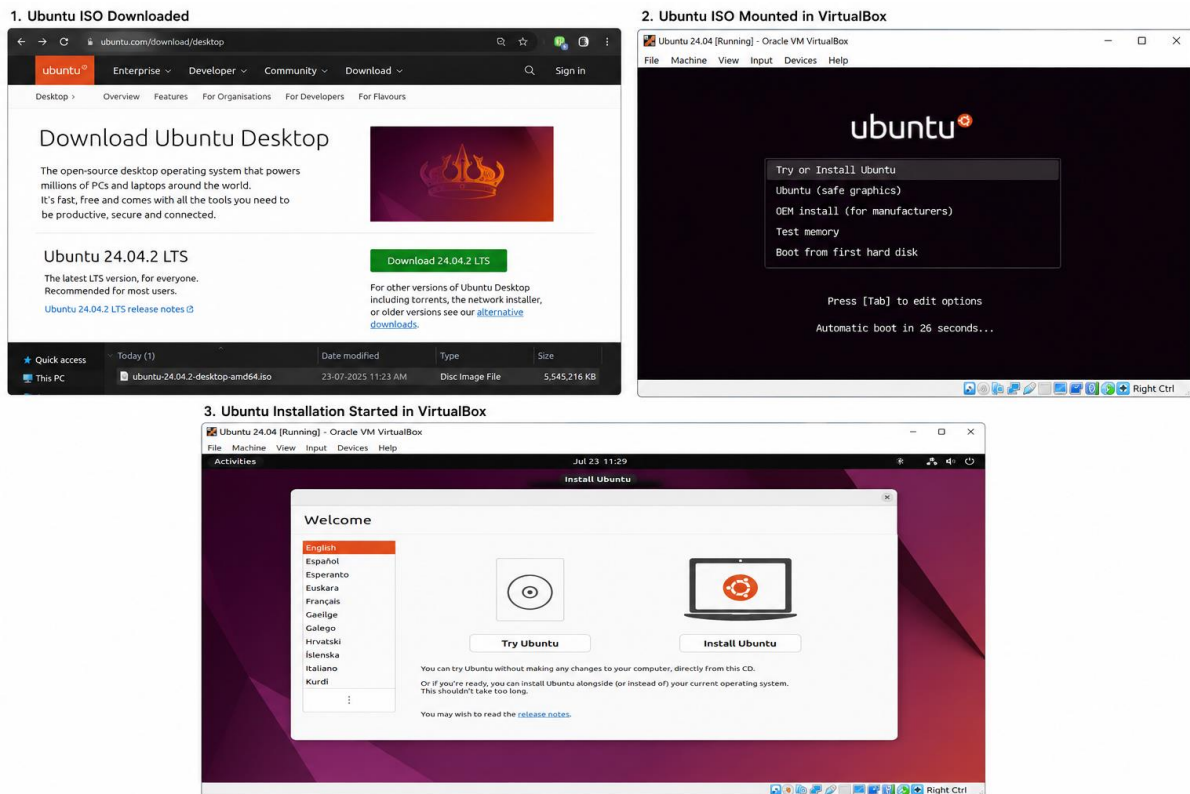

Fig 2. Ubuntu Installation

1. Download the Linux ISO
 - Visits the official Ubuntu website.
 - Downloaded the latest Ubuntu Desktop ISO file.
 - Verified that the ISO file was saved successfully on the computer.
2. Create a Virtual Machine
 - Opened Oracle VirtualBox.
 - Created a new virtual machine and selected Linux -> Ubuntu as the operating system.
 - Allocated the required RAM and created a virtual hard disk.
3. Mount the ISO
 - Opened the virtual machine settings.
 - Mounted the downloaded Ubuntu ISO as the virtual optical disk.
 - Saved the settings and started the virtual machine.
4. Start the Installation
 - The virtual machine booted from the mounted Ubuntu ISO.
 - Selected Try or Install Ubuntu from the boot menu.
 - The Ubuntu installer launched successfully and was ready for installation.
5. Result
 - The Ubuntu ISO file was downloaded successfully.
 - The ISO was mounted correctly in VirtualBox.
 - The virtual machine booted from the ISO without errors.
 - The Ubuntu installation process started successfully.

Task 3: On a macOS device (or using a macOS virtual machine), open 'System Preferences' and change the desktop wallpaper, then adjust the system language to Hindi or Gujarati. Hint: Find 'Language & Region' in System Preferences to add or change languages.

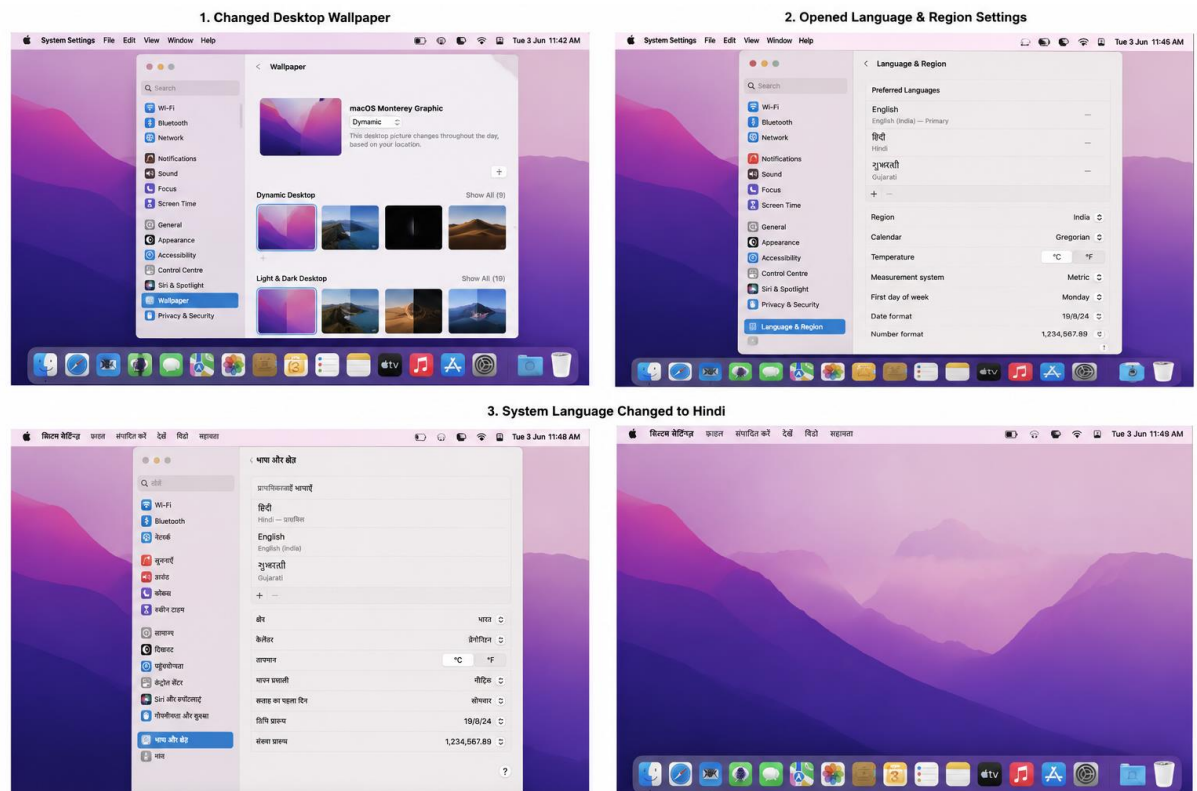

Fig 3. Mac OS Changing Wallpaper and Language

1. Change the Desktop Wallpaper
 - Opened **System Settings**.
 - Selected Wallpaper from the left Panel.
 - Chose a new wallpaper from the available options.
 - Applied the selected wallpaper successfully.
2. Change the System Language
 - Opened **System Settings -> General -> Language & Region**.
 - Clicked the (+) Add Language button.
 - Add **Hindi or Gujarati** to the preferred languages list.
 - Set the newly added language as the Primary Language.
 - Restarted the Mac when prompted to apply the language changes.
3. Verification
 - Confirmed that the desktop wallpaper had changed successfully.
 - Verified that macOS menus and system settings were displayed in the selected language (Hindi or Gujarati)

Task 4: Install a fresh copy of Ubuntu Linux (real or virtual machine) and create a new user account named 'gamer'. After installation, enable automatic login for this user and take a screenshot of the login screen showing the username.

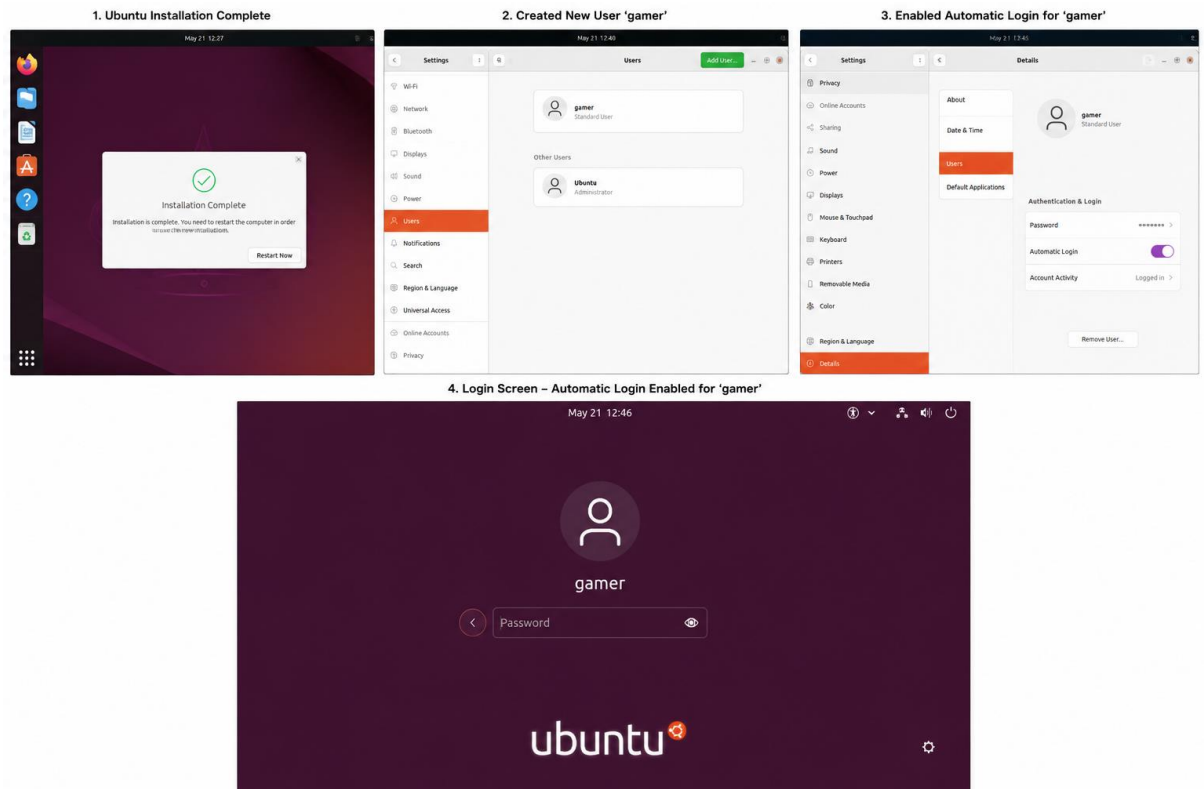

Fig 4. Creating user named "gamer" in Ubuntu

1. Install Ubuntu Linux
 - Downloaded the official Ubuntu ISO file.
 - Installed Ubuntu on a physical computer or in a virtual machine.
 - Completed the installation by following the on-screen setup instructions.
 - Restarted the system after the installation was finished.
2. Create a New User Account
 - Opened Settings -> System -> Users.
 - Unlocked the user settings using the administrator password.
 - Clicked Add User.
 - Created a new user account with the username gamer.
 - Saved the new user account successfully.
3. Enable automatic Login
 - Opened Settings -> System -> Users.
 - Selected the gamer user account.
 - Enabled the Automatic Login option.
 - Saved the changes and restarted the system.
4. Verification
 - After restarting, the login screen displayed the username gamer.
 - The system logged in automatically without requiring the user to enter a password.

Task 5: Use ChatGPT to generate a step-by-step guide for installing Windows 10 on a laptop, including partitioning tips and post-installation settings for privacy and updates. Follow the guide and note any steps that were unclear or missing.

1. Preparation

- Download the official Windows 10 ISO from the Microsoft Website.
- Create a bootable USB drive using the **Rufus**
- Back up all important files from the laptop.
- Ensure the laptop is connected to a power source.

2. Boot from the USB Drive

- Insert the bootable USB into the laptop.
- Restart the laptop.
- Press the boot menu key.
- Select the USB drive as the boot device.
- The Windows Setup screen will appear.

3. Install Windows 10

- Select the Language, Time & Currency, and Keyboard Layout.
- Click Next, then click Install Now.
- Enter the Windows product key, or select I don't have a product key, if you plan to activate later.
- Select the Windows edition that matches your license,
- Accept the license terms and click Next.

4. Partitioning Tips

- Select Custom: Install Windows only
- If performing a clean installation:
 - ➔ Delete the existing Windows partitions
 - ➔ Leave the Recovery and EFI/System partitions only if you plan to keep the existing recovery setup.
- Select the Unallocated Space and click New.
- Windows will automatically create the required system partitions.
- Choose the primary partition and click Next to begin installation.

5. Complete the Installation

- Wait while Windows copies files and installs features.
- The computer will restart several times automatically.
- Remove the USB drive when Windows restarts for the final time.

6. Initial Windows Set Up

- Select your Region and keyboard layout.
- Connect to a Wi-Fi network.
- Signs in with a Microsoft account or create a local account.
- Create a password and security questions if required.
